TOWARDS A NEW EUROPEAN CONSCIOUSNESS?

On May 26 and 27, 2019 the peoples of the 27 Member States of the European Union (EU) are preparing to vote. It is very difficult at this stage to anticipate what will come out of the ballot box. Indeed, the occurrence of political and social events of concern in several member states, is foreshadowing a more than uncertain future.

In this context, the **Observatoire des Valeurs**, the **World Human Forum**, the **Fondation des Transitions**, with the support of the **Greek Cultural Centre**, have decided to organise a meeting on **9 April 2019** at the Goethe-Institut in Paris on the theme "**Towards a new European consciousness?**".

Personalities from several European countries will share their views on this subject. In particular, the question of the value systems of the peoples composing Europe, what shapes them, their influence and their role in the cohesion or disunity of peoples will be addressed. It will also be examined how new modes of communication and new ways of living and working test them.
